#### **Important Notice:**

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is essential that you visit www.onesurvey.org (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

Prepared by	Grant Robertson, FRICS Glasgow North - Allied Surveyors Scotland Plc

#### SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)

#### **PART 1 - GENERAL**

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. <sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 $\overline{\Delta}$ 

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller:
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller:
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

#### 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

#### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

#### **PART 2 - DESCRIPTION OF THE REPORT**

#### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

#### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.* 

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

#### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 Category 1: No immediate action or repair is needed.

**WARNING**: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

#### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

#### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

#### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

#### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an

arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- \*There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- ➤ \*There are no particularly troublesome or unusual legal restrictions;
- \*There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

#### 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The property under report comprises a main door ground floor apartment, contained within a three storey and attic detached villa which has been sub-divided to form three separate dwelling flats.
Accommodation	The accommodation comprises:  GROUND FLOOR: Entrance vestibule, reception hallway, living room, master bedroom with ensuite bathroom and walk-in wardrobe, bedroom two, study, kitchen with dining area, family shower room.
Gross internal floor area (m2)	115 sq.metres
Neighbourhood and location	The property is located within the Kirklee district of Glasgow which lies to the west of the city centre and where surrounding properties comprise mainly similar quality Victorian houses, many of which have been similarly subdivided. All main amenities and facilities are available within close proximity.
Age	The property is understood to have been constructed around 1890 and is contained within the Glasgow West Conservation Area. The property is not listed within the Historic Environment Scotland portal.
Weather	Weather conditions at the time of inspection were dull but dry.
Chimney stacks	Chimney stacks are originally stone built but now part

	finished with dry dash render with clay and aluminium pots. Flashings, where seen from ground level, are formed partly in lead and partly in bituminous felt.	
	Visually inspected with the aid of binoculars where required.	
Roofing including roof space	The main roof is pitched and slate clad, with a flat top section. From our ground level inspection it would appear that this section of the roof is finished in felt, possibly over the original lead finish. The detail cannot be seen from ground level. To the rear of the property and specifically the area of roof finish over the bedroom and study accommodation of the subject flat, there is a section of roof finish which would appear to be finished in corrugated material. Visual inspection of this is also difficult but it would appear to be an original cement corrugated roof finish, overlaid with felt.	
	Access to any communal roof space would be through the top floor flat which was not undertaken at the time of our inspection. It would appear that the top floor duplex property has attic accommodation and therefore any roof space inspection would be severely restricted.	
	Sloping roofs were visually inspected with the aid of binoculars where required. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.	
Rainwater fittings	The rainwater fittings are typical for a property of this type having been originally formed in cast iron but repairs and replacements have now been carried out, in part, in PVC and aluminium.	
	Visually inspected with the aid of binoculars where required.	
Main walls	The main walls, to the main house, are of solid stone construction to all four elevations, whilst the rear adjunct which houses the bedroom accommodation of the subject flat, is constructed in solid brick.	
	Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.	
Windows, external doors and joinery	The windows are generally as originally installed, being single glazed double hung sash and casement style, with a replacement double glazed unit in the kitchen and a single glass pane to the unit in the study. This unit does not open.	

1	
	The entrance doors to the subject flat are formed with traditional solid timber outer storm doors and timber glazed inner door and there is a timber and glazed door leading from the kitchen to the private garden.  Internal and external doors were opened and closed where keys were available. Random windows were opened and closed where possible. Doors and windows were not forced open.
External decorations	Painted finishes to external ironmongery and timberwork.
	Visually inspected.
Conservatories / porches	Not applicable.
Communal areas	Access to the subject flat is through a private main door and therefore there is no access to any communal internal areas.
	Circulation areas visually inspected.
Garages and permanent outbuildings	The property benefits from a half share in the large and extended two car garage which sits to the rear of the site and is accessed by an electronic operated up-and-over door. The property owns the right hand side of this with a faint white line separating the two sides. There is no physical separation. The garage has a pitched and clay tiled clad roof, with a felt section to the front extension. The walls are of brick construction and rendered finishes, with an inspection pit within the half of the garage owned by the subject flat.  Visually inspected.
Outside areas and boundaries	The property benefits from a good sized private garden accessed directly from the kitchen and from a gate at the front entrance. The garden is level and well maintained with boundary walls and fences clearly defined.
	Visually inspected.
Ceilings	The ceiling finishes are formed generally in traditional wood, lath and plaster and plasterboard, where previous repairs and renovations have been undertaken.  Visually inspected from floor level.
Internal walls	Internal wall finishes are formed generally in wood, lath and

	plaster and plaster on hard, with plasterboard where internal repairs or renovations have previously been undertaken.	
	Visually inspected from floor level. Using a moisture meter, walls were randomly tested for dampness where considered appropriate.	
Floors including sub floors	The floors are of suspended timber joist construction with tongue and grooved stripped floorboarding. No access to any sub-floor area was possible at the time of inspection.	
	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.	
Internal joinery and kitchen fittings	Timber internal joinery, partly original and partly dating from subsequent refurbishment. The kitchen provides a range of integrated wall and floor units.	
	Built-in cupboards were looked into but no stored items were moved. Kitchen units were visually inspected excluding appliances.	
Chimney breasts and fireplaces	The original fireplace opening in the lounge has been removed and a more modern fireplace installed. This is fitted with a coal effect gas fire. There are no other fireplaces open and retained within the property.	
	Visually inspected. No testing of the flues or fittings was carried out.	
Internal decorations	Painted and or papered wall and ceiling finishes throughout.	
	Visually inspected.	
Cellars	Not applicable.	
Electricity	Mains supply. Consumer unit in hall.	
	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.	
Gas	Mains supply.	
	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried	

	out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.	
Water, plumbing and bathroom fittings	Mains water supply. Copper and PVC plumbing, where visible.	
	The family shower room comprises a wc, wash-hand basin and shower cubicle with electric shower, whilst the ensuite comprise a wc, wash-hand basin and bath.	
	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation. No tests whatsoever were carried out to the system or appliances.	
Heating and hot water	The property benefits from gas fired central heating served by a Vokera boiler located within the kitchen cupboard, serving hot water panel radiators in all main apartments and also providing hot water.	
	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.  No tests whatsoever were carried out to the system or appliances.	
Drainage	Understood to be by direct gravity outfall to the Local Authority mains sewer.	
	Drainage covers etc were not lifted. Neither drains nor drainage systems were tested.	
Fire, smoke and burglar alarms	The property is protected by an alarm system (dated). There is no hard wired integrated smoke/fire alarm system.	
	Visually inspected. No tests whatsoever were carried out to the system or appliances.	
Any additional limits to inspection	Only the subject flat was inspected. No access to the common stairwell or other units within the building was made.	
	Only the subject flat and internal communal areas giving access to the flat were inspected.  If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection	

was possible, the Surveyor will assume that there are no defects that will have a material effect on the valuation. The building containing the flat, including any external communal areas, was visually inspected only to the extent that the Surveyor is able to give an opinion on the general condition and standard of maintenance.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.

#### Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

#### 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement		
Repair category:	1	
Notes:	The building has not, in the past, suffered to any significant degree from structural movement. Evidence of past settlement movement, commensurate with a building of this age and type, is apparent but we do not consider any further movement likely.	

Dampness, rot and infestation		
Repair category:	1	
Notes:	Moisture meter readings taken throughout the ground floor of the property revealed no evidence of any significant dampness issues. Some soft plasterwork was noted to the rear of the master bedroom but this was tested and found to be dry. Within the limits of our inspection no evidence of any significant rot or infestation was apparent. No access to any sub-floor area was possible at the time of our inspection and we therefore cannot comment on the condition of timbers therein.	

Chimney stacks	
Repair category:	2
Notes:	Sections of the external chimneys have been affected by weathering and repairs have been carried out with the application of dry dash render. It is likely that further rendering/maintenance repairs will be necessary in the longer term, with attention required

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

to sections of coping stones and flashings. At the time of inspection we noted no evidence of significant deterioration or works requiring urgent repair. Our inspection was, however, severely restricted from ground level.

### Roofing including roof space Repair category: The external roof coverings appeared generally to be well Notes: presented in terms of the main property and we understand that a recent overhaul of the roof coverings, including scaffolding of the building, was undertaken. No clear sight was possible of the flat roof on top of the building and we have assumed therefore that this is finished in felt or similar material and will require more careful maintenance. Elsewhere, the roof slating and associated valleys, flashings, etc. will also require careful maintenance on a annual basis but no significant issues were apparent. The repair category relates to the section of corrugated finish roof over the rear extension which ideally should be stripped and replaced in slate or similar material. Care should be taken whilst removing the original corrugated panels, to ensure that these do not contain any asbestos. In situ, however, there is no risk at this time.

Rainwater fittings	
Repair category:	
Notes:	Rainwater fittings appear generally well presented with no obvious issues. Some vegetation growth was noted particularly to the front gutter and this should be cleared prior to winter.

Main walls

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Repair category:	2
Notes:	The external walls have been affected by general weathering and staining and a programme of refacing and repointing of affected areas will be required in the medium term. This work should be carried out in conjunction with the co-proprietors of the building.

Windows, external doors and joinery		
Repair category:	1	
Notes:	The external window frames and sills are generally in adequate order although many are painted shut and an overhaul will be required in the medium term to ensure that all windows open and to replace several cracked panes. We do not consider that any urgent work in this regard is required. Some refurbishment, to the front and rear entrance doors, will also be required.	

External decorations		
Repair category:	1	
Notes:	External decoration is generally in satisfactory order, particularly to the window units of the subject flat. Regrettably, most of the window units have been painted shut and these should be unstuck to allow opening for ventilation.	

Conservatories / porches	
Repair category:	
Notes:	Not applicable.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Communal areas		
Repair category:		
Notes:	Not applicable.	

Garages and permanent outbuildings		
Repair category:		
Notes:	The garage, which lies to the side/rear of the property, is shared with one of the co-proprietors and is in adequate order for current use and presentation.	

Outside areas and boundaries		
Repair category:	1	
Notes:	The property benefits from a good sized area of private garden ground, accessed from the kitchen and from a gate at the front door. The area is private and well maintained. Boundary walls and fences, in the longer term, will require a degree of maintenance.	

Ceilings	
Repair category:	
Notes:	The ceiling finishes are adequately presented with regard to the current decorative state of the building but in the longer term it is likely that as part of future refurbishment that areas of replastering will be required.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Internal walls	
Repair category:	
Notes:	Internal wall finishes are generally well presented with the exception of the wall finish to the rear master bedroom where some soft plaster was noted. During the course of future redecoration and refurbishment it is likely that replastering of areas of internal wall finishes will be required.

Floors including sub-floors	
Repair category:	1
Notes:	The floor finishes, where visible, were seen to be in satisfactory order. There was no access to any sub-floor area and therefore we are unable to comment on the condition of timbers therein.

Internal joinery and kitchen fittings	
Repair category:	
Notes:	Internal joinerywork is in satisfactory order, however, it is likely an incoming purchaser will undertake refurbishment of joinery and renew the kitchen.

Chimney breasts and fireplaces	
Repair category:	1
Notes:	The fireplace opening retained within the lounge is not original and consideration should be given to upgrading to a more authentic surround. We have assumed that the coal effect gas fire is Gas Safe compliant.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Internal decorations	
Repair category:	
Notes:	The property is in satisfactory decorative order throughout.

Cellars	
Repair category:	
Notes:	Not applicable.

Electricity	
Repair category:	2
Notes:	The electrical installation has been upgraded to an extent and there is a relatively modern distribution board. However, we are concerned that sections of the electrical installation do not comply to current regulations and we would recommend that the system be appropriately tested and upgraded where required.

Gas	
Repair category:	
Notes:	No visual defects apparent. We have assumed that the gas supply and appliances within the home are Gas Safe compliant.

Water, plumbing and bathroom fittings

## survey report

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Repair category:	1
Notes:	Plumbing and bathroom fittings are dated and it is likely that an incoming purchaser will upgrade both the family shower room and ensuite.

Heating and hot water	
Repair category:	
Notes:	The central heating system was operative at the time of our inspection, however, the radiator network and pipework are dated and it is likely that an incoming purchaser will undertake substantial renewal of the system. Ideally a copy of a recent servicing should be produced by the vendor.

Drainage	
Repair category:	
Notes:	No significant defects were evident.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information

Structural movement	1
Dampness, rot and infestation	1
Chimney stacks	2
Roofing including roof space	2
Rainwater fittings	1
Main walls	2
Windows, external doors and joinery	1
External decorations	1
Conservatories / porches	
Communal areas	
Garages and permanent outbuildings	1
Outside areas and boundaries	1
Ceilings	1
Internal walls	1
Floors including sub-floors	1
Internal joinery and kitchen fittings	1
Chimney breasts and fireplaces	1
Internal decorations	1
Cellars	
Electricity	2
Gas	1
Water, plumbing and bathroom fittings	1
Heating and hot water	1
Drainage	1

#### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

#### 3. ACCESSIBILITY INFORMATION

#### **Guidance Notes on Accessibility Information**

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES [ ]NO
3. Is there a lift to the main entrance door of the property?	[ ]YES [x]NO
4. Are all door openings greater than 750mm?	[ ]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[ ]YES [x]NO
6. Is there a toilet on the same level as a bedroom?	[x]YES [ ]NO
7. Are all rooms on the same level with no internal steps or stairs?	[ ]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES [ ]NO

#### 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

#### Matters for a solicitor or licensed conveyancer

All appropriate Consents should ideally be exhibited in respect of the sub-division of the property if available. Given that the conversion was probably carried out over 50 years ago it is unlikely any documentation will be available. We noted no recent alterations(within the last 20 years) for which consents are required to be shown.

#### Estimated re-instatement cost (£) for insurance purposes

£625,000 (Six Hundred and Twenty Five Thousand Pounds).

Building costs are currently increasing significantly above inflation due to material and labour shortages, as well as Brexit and the pandemic. It is recommended that you update this figure regularly to ensure that you have adequate cover or alternatively, seek specialist advice from your insurer.

#### Valuation (£) and market comments

In its current condition and with the current state of the property market, our valuation of the property is £535,000 (Five Hundred and Thirty Five Thousand Pounds).

Report author:	Grant Robertson, FRICS
Company name:	Glasgow North - Allied Surveyors Scotland Plc

# MORTGAGE VALUATION REPORT

Includes a market valuation of the property.

Mortgage Valuation Report				
Property:  18 Kirklee Circus Glasgow G12 0TW  Client: Mr Ivan Mavor/Ms K Mavor Ms A Shepherd/Mrs J Sim Tenure: Absolute Ownership				
Date of Inspection: Reference: GE/8469/GR/AMCG				

This report has been prepared as part of your instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising your lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

#### 1.0 LOCATION

The property is located within the Kirklee district of Glasgow which lies to the west of the city centre and where surrounding properties comprise mainly similar quality Victorian houses, many of which have been similarly sub-divided. All main amenities and facilities are available within close proximity.

2.0	DESCRIPTION	2.1 Age:	The property is understood to have been constructed around 1900 and is contained within the Glasgow West Conservation Area. The property is not listed within the Historic Environment Scotland portal.	
-----	-------------	----------	---	--

The property under report comprises a main door ground floor apartment, contained within a three storey and attic detached villa which has been sub-divided to form three separate dwelling flats.

#### 3.0 CONSTRUCTION

Stone built outer walls with pitched and slate clad roof. The rear adjunct is of solid brick construction with a corrugated roof finish.

#### 4.0 ACCOMMODATION

The accommodation comprises:

GROUND FLOOR: Entrance vestibule, reception hallway, living room, master bedroom with ensuite bathroom and walk-in wardrobe, bedroom two, study, kitchen with dining area, family shower room.

5.0	SERVICES (N	RVICES (No tests have been applied to any of the services)					
Water:	Mains	Electricity:	Mains	Gas:	Mains	Drainage:	Mains
Central Heati	Heating: Gas fired						
6.0	OUTBUILDINGS						
Garage:		Half share of la	arge garage at	side of building			
Others:		None					
7.0	GENERAL CONDITION - A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible. The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.						
					e required over and has been re		
8.0	ESSENTIAL I property)	REPAIR WORK	(as a condition	of any mortga	ge or, to preser	ve the condition	of the
None.							
8.1 Retention	recommended	1:	-				
9.0	ROADS &FO	OTPATHS					
Understood to	be made up an	d adopted.					
10.0	BUILDINGS I (£):	NSURANCE	625,000	GROSS EXT FLOOR ARE		138	Square metres
	This figure is an opinion of an appropriate sum for which the property and substantial outbuildings should be insured against total destruction on a re-instatement basis assuming reconstruction of the property in its existing design and materials. Furnishings and fittings have not been included. No allowance has been included for inflation during the insurance period or during re-construction and no allowance has been made for VAT, other than on professional fees. Further discussions with your insurers is advised.						
11.0	GENERAL RI	EMARKS					
All appropriate Consents should be exhibited in respect of the sub-division of the property if available. Given that the conversion was probably carried out prior to more recent alterations, lack of Consents would not be a significant valuation issue.							
12.0	VALUATION On the assumption of vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, title restrictions or servitude rights. It is assumed that all necessary Local Authority consents, which may have been required, have been sought and obtained. No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns then they should ask for a specialist to undertake appropriate tests.

# ENERGY REPORT

A report on the energy efficiency of the property.

# energy report

# energy report on:

Property address	18 Kirklee Circus Glasgow G12 0TW
Customer	Mr Ivan Mavor/Ms K Mavor Ms A Shepherd/Mrs J Sim
Customer address	18 Kirklee Circus Glasgow G12 0TW
Prepared by	Grant Robertson, FRICS Glasgow North - Allied Surveyors Scotland Plc

### **Energy Performance Certificate (EPC)**

**Dwellings** 

## **Scotland**

#### 18 KIRKLEE CIRCUS, GLASGOW, G12 0TW

Dwelling type:Ground-floor flatDate of assessment:09 August 2021Date of certificate:09 August 2021

Total floor area: 115 m<sup>2</sup>

Primary Energy Indicator: 378 kWh/m²/year

**Reference number:** 1619-4528-7000-0381-1202 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

**Main heating and fuel:** Boiler and radiators, mains

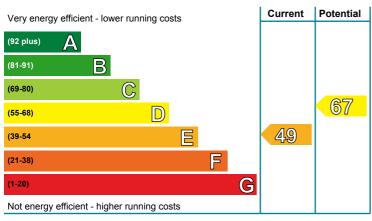

gas

#### You can use this document to:

- . Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£4,494	See your recommendations
Over 3 years you could save*	£1,593	report for more information

<sup>\*</sup> based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

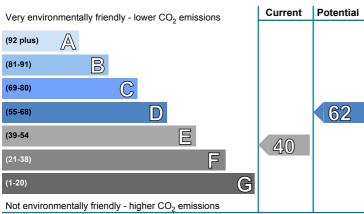

#### **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band E (49)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

#### **Environmental Impact (CO<sub>2</sub>) Rating**

This graph shows the effect of your home on the environment in terms of carbon dioxide  $(CO_2)$  emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (40)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

#### Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Internal or external wall insulation	£4,000 - £14,000	£915.00
2 Floor insulation (suspended floor)	£800 - £1,200	£417.00
3 Draughtproofing	£80 - £120	£78.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

#### Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, no insulation (assumed)	***	***
	Solid brick, as built, no insulation (assumed)	****	****
Roof	(another dwelling above) Pitched, no insulation (assumed)	_ ★☆☆☆☆	_ ★☆☆☆☆
Floor	Suspended, no insulation (assumed)	_	_
Windows	Single glazed	<b>★</b> ☆☆☆☆	$\star$ $\Leftrightarrow$ $\Leftrightarrow$ $\Leftrightarrow$
Main heating	Boiler and radiators, mains gas	<b>★★★★☆</b>	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	<b>★★★★☆</b>	★★★★☆
Secondary heating	Room heaters, mains gas	_	_
Hot water	From main system	****	★★★★☆
Lighting	Low energy lighting in 86% of fixed outlets	****	****

#### The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

#### The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 67 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 7.7 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 3.1 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

#### Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,921 over 3 years	£2,316 over 3 years	
Hot water	£267 over 3 years	£270 over 3 years	You could
Lighting	£306 over 3 years	£315 over 3 years	save £1,593
Totals	£4,494	£2,901	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

#### **Recommendations for improvement**

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		ludio divo cost	Typical saving	Rating after improvement		
		Indicative cost	per year	Energy	Environment	
1	Internal or external wall insulation	£4,000 - £14,000	£305	D 59	E 51	
2	Floor insulation (suspended floor)	£800 - £1,200	£139	D 64	D 57	
3	Draughtproofing	£80 - £120	£26	D 65	D 58	
4	Secondary glazing to single glazed windows	£1,000 - £1,500	£61	D 67	D 62	

#### Choosing the right improvement package

#### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

#### 1 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

#### 2 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

#### 3 Draughtproofing

Fitting draughtproofing, strips of insulation around windows and doors, will improve the comfort in the home. A contractor can be employed but draughtproofing can be installed by a competent DIY enthusiast.

#### 4 Secondary glazing

Secondary glazing is the addition of a second pane of glass inside the existing window. Adding secondary glazing will improve comfort in the home by reducing draughts and cold spots near windows. It may also reduce noise and combat problems with condensation. Installation can be carried out by a competent DIY enthusiast. Building regulations may apply to this work, so it is best to check with your local authority building standards department.

#### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

#### Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to www.energysavingtrust.org.uk/scotland/rhi.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	21,039	(2,327)	N/A	(5,696)
Water heating (kWh per year)	2,123			

#### Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

#### **About this document**

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Grant Robertson

Assessor membership number: EES/008401

Company name/trading name: Allied Surveyors Scotland Plc

Address: 24 Herbert Street

Glasgow G20 6NB

Phone number: 01413309950

Email address: glasgow.north@alliedsurveyorsscotland.com

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

#### Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

## PROPERTY QUESTIONNAIRE

The owner of the property is required to complete this document which asks for information on the property such as 'Which council tax band?' etc.

# **Property Questionnaire**

Property Address	18 Kirklee Circus Glasgow G12 0TW	
Seller(s)	Mr Ivan Mavor/Ms K Mavor Ms A Shepherd/Mrs J Sim	
Completion date of property questionnaire	10/08/2021	

Note for sellers

1.	Length of ownership		
	How long have you owned the prope 20 years	rty?	
2.	Council tax		
	Which Council Tax band is your propagate [ ]A [ ]B [ ]C [ ]D [ ]E [ ]F [x]G [ ]H	perty in? (Please circle)	
3.	Parking		
	What are the arrangements for parking at your property? (Please tick all that apply)		
	Garage	[x]	
	Allocated parking space	[]	
	Driveway	[x]	
	Shared parking	[]	
	On street	[x]	
	Resident permit	[]	
	Metered parking	[]	
	Other (please specify):		

4.	Conservation area	
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	[x]YES [ ]NO [ ]Don't know
5.	Listed buildings	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	[ ]YES [x]NO
6.	Alterations/additions/extensions	
а	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	[ ]YES [x]NO
	If you have answered yes, please describe below the changes which you have made:	
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	[]YES[]NO
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	
b	Have you had replacement windows, doors, patio doors or double glazing installed in your property	[ ]YES [x]NO
	If you have answered yes, please answer the three questions below:	
	(i) Were the replacements the same shape and type as the ones you replaced?	[]YES[]NO
	(ii) Did this work involve any changes to the window or door openings?	[]YES[]NO
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):	
	Please give any guarantees which you received for this work to your solicitor or estate agent.	

7.	Central heating		
а	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).	[x]YES [ ]NO [ ]Partial	
	If you have answered yes or partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).  Gas-fired		
	If you have answered yes, please answer the three questions below:		
	(i) When was your central heating system or partial central heating system installed?  Approx 2016		
	(ii) Do you have a maintenance contract for the central heating system?	[ ]YES [x]NO	
	If you have answered yes, please give details of the company with which you have a maintenance contract		
	(iii) When was your maintenance agreement last renewed? (Please provide the month and year).		
8.	Energy Performance Certificate		
	Does your property have an Energy Performance Certificate which is less than 10 years old?	[x]YES [ ]NO	
9.	Issues that may have affected your property		
а	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	[ ]YES [x]NO	
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	[]YES[]NO	
b	Are you aware of the existence of asbestos in your property?	[ ]YES [x]NO [ ]Don't know	
	If you have answered yes, please give details:		
10.	Services
